📅 2009 - 2010   🏢 Australia

- Elite sports contract
- Team player
- Self empowerment

CAREER OBJECTIVE

🚀 I have gained a ton of skills in both web development and UX/UI design and I believe that under the right guidance, I can become a valuable and resourceful addition to any team.

I have a great ability to collaborate effectively with other developers while spending extra time being mentored where I ensure workloads are effectively redirected to bottlenecks and personally picking up the slack when necessary.

My passion for software development has led me to complete a 700+ hours of coding bootcamp to be a certified fullstack developer. I am ready to apply and share my fondness for coding and design with other talented engineers to develop quality solutions and gain noteworthy industry experience. This will not only build a great portfolio but boost my self confidence as a software developer.

Journey of Learnings

Bachelor in Creative Technology
